# Day-by-day programme

---

## Day 1 Departure for Iturup. Vannochki thermal pools

---

Arrival on Iturup, transfer. Time at the famous Vannochki thermal pools on the slopes of Baransky Volcano — closed wooden tubs under a roof, changing rooms and rest areas. Some of the pools are outdoors, with the water staying hot all year round.

We recommend: swimwear, a towel and a sheet. Sheets at Vannochki cost 50 ₺ each.

## Day 2 Baransky Volcano or SPA complex. Yankito lava plateau

---

Tour to the foot of Baransky Volcano — scenic volcanic landscapes, mud cauldrons, hot lakes and mineral streams. Then on to the Yankito lava plateau at the foot of Bogdan Khmelnitsky Volcano, formed during eruptions several thousand years ago.

Please note! Bathing is permitted only in springs of suitable water temperature. In winter the temperature does not exceed +30°C. Time at the thermal springs is limited to 1 hour, at the SPA complex to 2 hours. The trip to the foot of the volcano may be replaced with a visit to the SPA complex in case of bad weather, poor road conditions, low temperatures or insufficient sign-ups for the snowcat (fewer than 10 people).

We recommend: dress warmly — hat, gloves, windproof and waterproof clothing; swimwear, a towel and a sheet.

## Day 3 Kasatka Bay. Flight to Yuzhno-Sakhalinsk

---

Excursion to Kasatka Bay on the Pacific side of the island — a deserted, scenic cove where you will feel the harsh character of the Pacific Ocean. On the shore stands Devil's Rock, cut through with natural and man-made tunnels and caves. Kasatka Bay is a historically significant site: in 1941 the Japanese carrier strike force set out from here to attack the American naval base at Pearl Harbor. Flight to Yuzhno-Sakhalinsk.

We recommend: the excursion takes place on the coast — dress warmly, you will need a hat, gloves and a windproof, waterproof jacket.
